Australia

Dear Ralph:

I had made a note to drop you a note to acknowledge our delightful conversation at the governor's house, but you beat me to it! Thanks also for the (distorted) newspaper article. I am in admiration of your partnership and your new life. You have obviously done very well for yourself. Thank you for your comments, and I, too, would be grateful to keep in touch.

We've had the visit last December of Bernie McKay, an impressive person with his encyclopedic grasp of many medical and prevention issues. We're talking about the possibility of developing a US/Australian Health Treaty in the area of epidemiology, prevention and public health. At the moment, it's only a pipe dream.

Cordially,

Henry Blackburn, M.D.
Professor and Director
