October 17, 1986

TO: Frank Cerra
FROM: Henry Blackburn
RE: PEW

There can't be two centers. Will Kellogg be happy if we're all together as one?

The uniqueness of the SPH and St. Paul components could come through better in page 1.

Active researches on diet and eating patterns, influences on their modification, in groups and in whole ~~committees~~, is unique in Minnesota, giving exposure of graduate students to epidemiologic methods of design and evaluation, and systematic population approaches to nutrition education and evaluation of its influences.

Committees!
