Director, Medical Biophysics and Bio-Engineering
Research Laboratory
Dalhousie University
46 Sir Charles Tupper Medical Building
Halifax, Nova Scotia B3H 4H7 CANADA

Dear Pentti:

I had heard that you might be going to Washington and had given up on the idea of your coming here. I'm delighted to hear that it's still a possibility. You will be appalled by the absence of technical advancement that we've made in some areas of this Division but we concentrate our energies more and more on population studies and interventions rather than laboratory and methods. On the other hand, if it's simply a quiet and supportive environment that you need, we would be most happy to have you and your family here. Ron Prineas will be absent from the end of June until the end of the year and welcomes you to roost in his office. Let us know as your plans develop.

Thanks for the recent card from Cortina; I love the little notes from you and Farida dropped off around the world.

Cordially,

Henry Blackburn
Professor and Director
