Pat Buffler
Professor of Epidemiology
University of Texas
Health Science Center at Houston
PO Box 20186
Houston, TX 77025

Dear Pat:

It was delightful to get your very kind Christmas card. We're still disappointed that you didn't accept the Mayo Professorship which still lies fallow, though there is a new and excellent head of Environmental Health coming next month from Harvard, Ian Greaves.

Things go briskly here, and in a very short period of time we have developed a going concern in cancer epidemiology and prevention research and have solid beginning on infectious disease. Thus we become a more balanced and interesting Division. Wish you were here!

Cordially,

Henry Blackburn, MD
Professor and Director
