Cornell University  
Ithaca, NY 14853

Dear Dr. Campbell:

Congratulations on your proposal before Congress for a long term cohort study of diet and disease. I imagine you are familiar with the activities of Jerry Stamler to achieve the same end. If not, it might be useful for you to touch base with him.

You should also be aware of the soon-to-be-published USPHS Report on Diet and Health and another major report due at the end of this year from the National Academy of Sciences. The latter takes very much into consideration your ideas about the total impact of diet on chronic diseases and mortality.

Cordially,

*Henry Blackburn (ms)*
