Aug 18

Dear Henry -

Two things:

1) Volley Paul's biography of Paul White arrived today - 'Take heart'. have you seen it, maybe in manuscript? - I think you will like it, though wonder if it would have been better in a regular chronological sequence.

2) Michael Criley is organizing a symposium in honor of George Burch at the meeting of a society he created - Ass. of U. Cardiologists - Jan January in Carmel:

Yes -! Would you be susceptible to an invitation to speak, if such were forthcoming? Actually I do not remember epidemiology being a topic on any program and maybe the organizers would continue their previous pattern of program? Probably.

Thanks for the copy of Anthropology - Epidemiology paper - I did see it just the same time in the museum publications.

George always supported me, but considered me "way out" of his student. ->
