

pressed by the manuscript I showed him and his main comment was that this should be presented in two parts, or two papers, if the mortality data (all in Minneapolis) yield significant trends (different in each area).

The net result of this meeting was that if the data ~~are~~ out and no one can sit down and work on them I may have to return, possibly in conjunction with one of Ancel's visits, I leave it up to David and you to suggest a proper time.

I wish to thank you wholeheartedly for the hospitality, the help and the stimulating atmosphere I relished in Minneapolis, the opportunity to meet Barry Lewis, the evening with Hal Holbrook, the delightful new additions to your life, and all the pleasures which all friends made to me. My only wish at this time is to have an opportunity to retaliate on you on European ground.

Hoping to see you soon this way or that way of the Atlantic, and with best wishes for a continued active and successful career,

As ever,  
Andy
