Dear Bill:

The enclosed CVs on the Rossouws show an outstanding, mature couple, whose functions complement each other beautifully in clinical, laboratory and population research and prevention programs. I think a person in your position should be aware of their availability for emigration here. I'm not sure I'm going to be able to produce something for them in Minnesota, but singly or together, they would be a very productive acquisition for many centers and projects.

Cordially,

Henry Blackburn, M.D.
Professor and Director
