RE: Graduate Summer Session

B

---

Prior to the visit of Phil Brachman on March 4, Dean Kane needs an understanding of our direct and indirect contributions as a Division to the Graduate Summer Session in Epidemiology. If you could list the support function and the salary we provide, I would appreciate it. This will include whatever services, supplies and so forth we give to Len Schuman and his secretary, plus summer session activities by faculty contribution. That would be my Planning Committee role; Mike Sprafka, associate for Len Schuman; John Potter, as co-director of Cancer Epi; Mike Osterholm as co-director of Infectious Disease Epi. Anything else that you can think of? Thanks.
