Dear Henry,

What a great joy it was visiting with you and having yet another opportunity to learn from you at the Tahoe Seminar. I frankly admit that you and Paul have done a great job in helping me focus a number of my subliminal interests to which I had not given enough attention in the past. It's a real privilege to have both you and he as colleagues and friends. I only regret that I was not a part of that seminar in 1976 so that I might have brought my interests into closer focus at a much earlier date. The experience has helped me more than I think either of us can recognize now.

It was an added pleasure spending some time in the joint company of Katia, and Stacy. I am sorry that Dawn could not have shared more of those experiences with us. Perhaps some other time? I certainly hope so.

Sincerely yours,

Love
Douglas D. Schocken, M.D.
Associate Professor of Medicine

P.S. I sincerely hope that the remainder of your sabbatical time and travels are both fun and useful.
