Dear Ray:

Thank you for your marvelous arrangements for the Fargo/Moorhead Site Visit and for the useful discussions. I think we must implement promptly the meetings with the long-range planning committee and include Yvonne and anyone else you think is appropriate. We are prepared to move ahead here, starting in April. I would like us to not lose momentum of your excellent meeting.

Clearly we're going to stick with you as long as the program exists. However, I would very much like to hear of any contacts you think we might make more effectively with educational leaders and social scientists in the local universities to sit with your committees and provide true collaboration.

Cordially,

Henry Blackburn, M.D.  
Professor and Director

*Ray: Russ felt this was very "directive" - it was meant to be enthusiastic about your activities & indicate our support & your moving forward actively. I found the most grasp & impetus in your L-R planning group when I circulated. Thanks for all -  
Henry*
