Dear Dr. Richard:

It was a pleasure to hear from you and we're delighted that you will be visiting this country. We have a vigorous group concerned with surveillance research in the Minnesota Heart Survey. We completed a major site visit this week with the hope of being renewed for another 5 years. All the principals of that study plan to be in Minneapolis from the 12-16 of June and 26-30 of June. On June 12-14 we have ongoing a major dissemination conference as announced in the enclosed brochure. This conference is primarily to sum up our findings in the community demonstration project for the regional public health community. You might find that interesting but on the other hand it might take away time from your dealing with our surveillance activities. In that case, you might prefer the week after Washington. Either is fine for us and I will be happy to make arrangements for your stay at the Radisson University. Will your wife make the trip with you?

It would be very useful if you would be willing to give us a seminar on comparative CHD incidence in France and its possible causes. We would be happy to find a modest honorarium to support this.

Cordially,

[Handwritten signature]
