Director, Medical Biophysics
Dalhousie University
46 Sir Charles Tupper Medical Building
Halifax, Nova Scotia B3H 4H7

Dear Pentti:

I just received "Count" Lequime's note about the Rijlant Prize. I did not know that you had received that jointly with several distinguished colleagues last winter in Brussels. It is well deserved and I hope you had a good time there.

Things go well here. Richard Crow is remarkably effective in organizing the Coding Center and has a very exciting administrative assistant who is doing great things. I am very grateful for your generosity with the Dalhousie Program and I am sure Richard will use it appropriately.

We miss Ron Prineas, but he seems happy in his new career.

It would be nice to have you and Farida as guests here anytime you are crossing the country or specially on invitation. I am dreaming of a 50th anniversary of the Division, but things seem much too complex to try to do it this Fall. I am hoping to arrange it for the Spring and am hoping for Ancel's good health until that time. I am suffering now with my longest term friend, Albert Sullivan (Tulane and Paris internship days), who has a temporal lobe astrocytoma. Life is great and life is hell. Affectionate regards to you and your sweet spouse.

Cordially,

Henry Blackburn, MD
Professor and Director
