August 30, 1989

TO: Cherie Perlmutter, Associate Vice President for Health Sciences
FROM: Henry Blackburn *B*
RE: Health Sciences Advisory Council Presentations from the School of Public Health, September 14

Bob Kane has indicated that we from Epidemiology should count on an hour presentation in that program. The central characters are involved in our academic year student orientation for that afternoon. We are hoping, therefore, that you can put us on for the last hour rather than the first, if that's at all possible!

We propose the general topic be: "Community Outreach in School of Public Health Researches".

Presenters:

Russell Luepker: Minnesota Heart Health Program

Cheryl Perry: Minnesota Youth Programs in Eating and Exercise Patterns, Alcohol and Drug Abuse

David Murray: Minnesota Youth Smoking Prevention Programs

John Potter: Community Dietary Strategies Against Cancer.

I am very sorry that my appointment to the Advisory Board of the National Heart, Lung and Blood Institute will have me out of town that day. I am sure our staff will do a good job. They are pretty good at making "crisp, eight-minute presentations". Would you let me know if there is a problem, and whether we are all invited to the dinner afterward.
