Dear Christine:

Many thanks for your note and the proposal for the Conference which looks superb. You have a marvelous group of participants and it will be fun to be a part of it.

Cheryl Perry perused the Conference agenda and agrees with me that neither the Minnesota nor Stanford adolescent interventions are well represented.

Other topics she suggested for the Conference include:

- 1) Community-wide approaches to CVD prevention (Minnesota Class of 1989 Study)
- 2) Parental involvement in eating pattern changes (Minnesota Home Team Study)
- 3) State-wide dissemination of school-based behavioral programs (Minnesota-Wisconsin Anti-Smoking Project)
- 4) School food service intervention approaches and outcomes (Minnesota Heart Health Program and CATCH)

Cheryl also has other ideas about potential participants if you should want to touch base with her. She can be reached at 624-1818.

Cordially,

Henry Blackburn, M.D.
Professor and Director
