Dear Henry:

Just a brief note to transmit to you the attached reprint on our latest work on the ECG risk, a product of the fine efforts of Dr. Youlian Liao from Guangzhou when he was with us for three years as a post doctoral fellow (one of the best if not the best we have had, reminding me much of Tomi). Any comments you have would of course be appreciated.

Let me take the opportunity to inquire as I sit here in Pioppi pondering various aspects of our work, when the text of the MAS-NRC report will be available. This is being dictated on December 26 (a beautiful and warm sunny day here), and I have before me a letter just received from WHO concerning a conference on Nutrition & Chronic Disease scheduled for March. I am not entirely certain whether or not I will participate, and am exchanging letters with colleagues in Geneva in relation there to. Should I do so, I certainly would like to have available the important report all of you are working on. Your advice in this regard would be appreciated. At this juncture I have no idea who else is being invited to be a part of this WHO endeavor--and in fact this is one of my questions.

All the best to Stacey, everyone else there, and yourself from Rose and me.

Cordially,

Jeremiah Stamler, M.D.

Dear Colleagues:

This is to let you know that an outstanding University of Minnesota faculty person, Bernard Mirkin, is coming to Northwestern to develop a new institute for childrens' education and care. Bernie is a gentleman and scholar. He can argue (and activate) politics with the best. He will make an outstanding member of your faculty and a good colleague. He also has close connections with the Ravinia management that might even be useful.

Cordially,

Henry Blackburn (nt)
