Dear Henry,

Thank you very much indeed for your letter of January 31 and enclosed papers.

Ofcourse I understand that you could not fix your thoughts on anything else but your son's disease. I hope sincerely that the achieved improvement stays and that he can resume and enjoy much of this normal activities.

Daan Kromhout and I are much interested in going on and extend the Zutphen survey. Our financial position is however very difficult. Daan Kromhout tries very hard to raise funds; he will write you about details. All planning is delegated to him; of course I will support the joint plans and programm as much as is possible. The seven country study is such an unique study, that we must try anything to continue it for a very long time !  
With my very best wishes to yourself and your family,

Sincerely yours,

Dr.L.M. Dalderup.
