Eusterman

25 October.

Dear Henry,

Just a note to inquire where I can find those "Greater Goodness" courses with Charlotte. I had read the article by Lawrence et al and was somewhat confused so thanks for your reply - and the other letter writers also.

I am substituting for a community physician who is taking a sabbatical for a quarter and am enjoying my return to work. The clientele is certainly different than the geriatric practice I had during my last ten years of practice. The home lots of space and an excellent library in a pleasant environment and it is a temptation to apply for a full time job.

I will probably return from the board of the new "Health Promotion Group" prior to heading to Naples for the theater on December first. The Mankato Area, and myself, want to thank you for your contributions to this area and I sincerely

hope that you will maintain and interest
in our part of the world.

The present group is entirely changed from
the "old" group which included Cooper, Paul
Stearns and all and I believe it is time
for his old man to step down and out of the
organization. My big secret is that it will
be run by a group that does not contain
a physician and that "Illness" will be
engineered by lay people, some of whom are
serving for very selfish reasons.

Thanks again and do call me if you are
in Mankato or in Naples.

Sincerely
John Custerman
