Dear Sandra and Allan:

Many thanks for your sweet note and the marvelous pictures. I am impressed with your idiot-proof apparatus and hope it worked out equally as well in South America. We're grateful for your note and for Allan's recent call. John has been through a very bad period in the last couple of days, with some complication to drugs or the withdrawal of steroids, we're not sure what, but seems to be back on the track again. He is remarkably good natured and resilient and forward looking.

We had our first outdoor jazz party in 6 or 8 years in this family Tuesday night under our Indian wedding tent and things really cooked.

Your summer tour looks formidable, but I'm sure there will be great times. We appreciate having your schedule.

Cordially,

Henry Blackburn, M.D.  
Professor and Director
