# JW MARRIOTT HOTEL

Henry

About 10 days ago I decided, after a prolonged bout of indecision and a very thorough review of pros and cons, to remain @ Stanford.

As a consequence I feel that a burden has been lifted (my digestion now works better) and I am excited about chances of changing my life (and the Center's) for the better.

Thank you very much for your help, support and patience.

Delighted - Jack!!  
- Grant!!  
Did you go to the last  
Guidelines committee meeting?  
- ~~to~~ you

Dear Jack:

We have worked hard to put the Low Cholesterol Workshop together. I am sorry I haven't consulted with you before on it. Claude has cut way back on the budget and everybody that is invited is needed badly. You are particularly needed for the second day's discussions and input into the panel on research needs. I would also like to involve you in thinking about the executive summary. At any rate, we definitely need you for both days of the workshop. If you have to miss one day, you will be taking somebody else's place, among at least a dozen people that we wanted to get there but weren't able to include because of the budget. You are the person for these ecological correlations as you did one of the first analyses of this and you should get the credit and have the responsibility of putting it together. We really need you for both days and hope you can make your plans accordingly. It should be reasonable fun, though it was not what we had in mind. The latter was to gather a small group of 10 to 15 people together in Minnesota and really knock this stuff around.

Cordially,

*Henry (mf)*

Dear Jack:

I haven't thanked you for the two versions of your JAMA paper. Please let us know when it's going to be released so that we can be prepared for the certain secondary questions that will be pointed to us after the questions directed to you.

I never thanked you formally for your contribution to the thankless symposium session we had for AAAS in New Orleans. I would welcome your ideas and agenda for the next period (other than ideas for other symposia, which will not be a central part of my recommendations) and whether you might be interested in "working up the ladder" to a responsible position in that organization.

Cordially,

Henry Blackburn, MD  
Professor and Director

Dear Henry:

Thank you for your comments on the New Orleans conference. I was happy to help and I don't want you to have any chagrin or regrets over it.

*Thanks.*

Do you know whether we both are scheduled to do something at Lake Tahoe this summer? My son's college career at Duke begins on August 4th so I could be at Tahoe any time after that.

*We have been reduced to 2 weeks!*

On another topic, am I needed on both October 9th and 10th? I find that I have a possible conflict for at least part of one of those days. I will be in the Washington area on October 8th, 9th and 10th.

Sincerely yours,

*Jack*

John W. Farquhar, M.D.

*which I will do as I have to be there also to give R. Shephard's talks this year. Sorry I can't distract you!*

*I had written you the enclosed urgent pleas to be here on Oct 9 & 10, & assumed you both of reply indicated consent. Please call if impossible. Thank you*

*N.F. a check my earlier letter to Dr. Farquhar. FAX all!*

re: Your Smoking Conference

Dear Jack:

We think one of the most effective pedagogues, and certainly one of the soundest researchers in the area of smoking interventions is, Harry Lando. If there is at present no active collaboration between your experts and him, I think it might be mutually useful to establish one. I was just noticing the excellent line-up you have for your July meeting. I enclose Harry's contributions in this area.
