

Do you routinely see The Arch. Int. Med. The May issue has the report of the Joint National Committee on Blood Pressure etc; and a paper on the Leiden study of a group followed by Kromhout et al, knowing their initial cholesterol levels. I enclose a couple of pages, in copy - the graphs were presented somewhat uniquely to me - % survival without myocardial infarction, and without cancer. I expect you are familiar with the work -

sincerely -

Howard

P.S. Ancel should not have mentioned bulimia and anorexia - It is not a problem (yet?) in men, in the executive age particularly -
