Uppsala 5th of July

Dear Henry

Thank you very much for the book "The Seven Countries Study" and the notes especially "A certain age".

A lot of memories from our time together appeared and your messages as a mentor to me as a student was touching and gave me much joy.

"The Seven Countries....." will be much useful when writing the story about "Men born in 1913 Study"

My cancer of prostate developed in a crazy way metastases in the lung and in pleura in the beginning of this year and life was gloomy but my doctor blocked the LH and I am now climacteric with hot flushes and the metastases disappeared and I feel fine.

I am on sabbatical year till the end of this year and will visit USA-friends in november (Curt Furberg among others)

Again thank you very much and all the best.

At last I have made a translation into swedish of "A certain age "
Can you tell me the source.

Yours sincerely

Gösta Tibblin
