Jean Lequime

Dear Henri,

The Jury of the Professor Pierre Rijlant Foundation for Cardiac Electrophysiology, set up by Pierre Rijlant for the purpose of continuing his work, awarded the Prize of the Foundation first to a team that consisted of Rautaharju, Montague, Taccardi and Kornreich. It was then awarded for the second time to Noble (Oxford) and Carmeliet (Louvain). Recently, this Prize was awarded for the third time to three prizewinners, namely Professor Di Francesco of Milano, Professor Guy Fontaine of Paris and Allen Scher of Seattle. It was been decided that considering his pioneering work in the field of cardiac electrophysiology, Professor Otto Schmitt would be appointed Honorary Member. I have written a letter to congratulate and inform him that the diploma and the medal will be presented to him in the course of the coming year.

Hoping to have the pleasure of meeting you again soon,
I remain,

faithfully yours,

Jean Lequime

Professor J. LEQUIME.
