Dear Henry:

I hope that this note will find you and Stacey in good health and in good spirits! Farida and I enjoyed very much our visit to your beautiful house. The coffee Katja made was outstanding. I trust that Heidi is doing well with her expanding family. My tour around the old Minneapolis (Seven Corners area etc.) brought a bit nostalgic memories.

May I bother you with a request for a favor. I am going through the formalities to secure a position at the Bowman Gray Medical School of the Wake Forest University. For this purpose I have to get reference letters from no fewer than five full professors who know me well enough to make a statement about my suitability for an academic position as a full professor with tenure. I was wondering if you would be kind enough to write such a letter for me. The letter should be addressed and mailed to:
