I also would prefer not to accept any more money from them for the ISC Seminars. We do enough for them with your important validation study. I think they have used you, Jim Scheenberger and Cam Moses in a very compromising way, in quotes and on T.V.

Since I know you generally favor AHA screening efforts, I would like your advice on how these efforts can be coordinated with proposed trials. Should we ask for a recommendation from the Community Program Committee showing their awareness of the problem which will arise with a parallel AHA community risk reduction effort?

Hope you had a good trip.

Regards,

Henry Blackburn, M.D.
